LISTING OF CLAIMS

A 1 . (currently amended) A method of doing business where a wireline telephone company provides wireless telephone communication through a telephone network including:

B providing a plurality of telephone signals over one or more wireline connected to one or more network nodes in wireless communication proximity to one or more telephone users; and

selectively responding to requests from one or more wireless devices for telephone network attachment through a wireless communication with the network node device based on wireless device user information provided to said network node.

2. (original) The method of claim 1 where:

At least one wireline is dedicated to a particular user.

Serial No. 09/664,329  
Art Unit No. 2642

3. (original) The method of claim 1 where:

At least one wireline can be shared among multiple users.

A  
B  
4. (original) The method of claim 1 where:

At least one user has access to both dedicated and shared wirelines.

5. (currently amended) The method of claim 3 where the telephone company sells priorities for sharing and wherein said selectively responding based on wireless device user information is based on said priorities.

6. (currently amended) The method of claim 3 where the telephone company sells the ability to pre-empt other calls and wherein said selectively responding based on wireless device user information is based on said ability to pre-empt.

7. (original) The method of claim 6 where the telephone company sells priorities for preemption.

Serial No. 09/664,329  
Art Unit No. 2642

8. (currently amended) The method of claim 4 where the telephone company sells a multiplicity of telephone service access levels including:

A  
B  
single phone number, one guaranteed line, other concurrent calls on a preemptive basis and wherein said selectively responding based on wireless device user information is based on said service access levels.

9. (currently amended) The method of claim 4 where the telephone company sells a multiplicity of telephone service access levels including:

single phone number, one guaranteed line, other concurrent calls on a next available basis and wherein said selectively responding based on wireless device user information is based on said service access levels.

10. (currently amended) The method of claim 4 where the telephone company sells a multiplicity of telephone service access levels including:

Serial No. 09/664,329  
Art Unit No. 2642

A  
B  
At least one of a multiplicity of maximum numbers of concurrent calls per telephone customer and wherein said selectively responding based on wireless device user information is based on said service access levels.

11. (original) The method of claim 1 where the telephone company sells a service including:

Bridging multiple handsets or modems to a single call connection.

12. (original) The method of claim 1 where the telephone company sells a service including:

A handset or modem requesting privacy on a call.
